FOR BRANDS RUNNING META ADS
DTC & ECOMMERCE

A creative department for brands that run Meta ads.

Fresh UGC-style ad creative every month, so your campaigns never go stale. Meta rewards volume now — the brands that win test more hooks, more angles, more often. **We make the creative. You run the ads.** No studio shoots, no influencer wrangling, no waiting weeks for one spot that fatigues in ten days.

HOW IT WORKS — MONTHLY CREATIVE SPRINT

STEP 1
Concepts
3–4 fresh concepts each month, built from your product, your reviews, and what already works in your account.

STEP 2
Hook matrix
Every concept gets multiple first-3-second hooks. The hook decides whether anyone watches.

STEP 3
Native creative
UGC-style presenters, demos, and testimonial spots that belong in the feed. Lo-fi on purpose. 9:16, plus 1:1 and 16:9 cuts of winners.

STEP 4
Readout
Monthly report: which hooks won, what fatigued, and what we make next. Evidence, not opinions.

1 Starter

$1,500 PER MONTH

8 ad variants from 2 concepts, with hook variations on each. Enough fresh creative to keep a small account learning. For brands spending under $10k/month on ads.

2 Growth — FLAGSHIP

$2,500 PER MONTH

20 variants from 4 concepts with a full hook matrix, plus a monthly performance readout with recommendations for the next sprint. The volume that actually moves results — most brands land here.

3 Scale

$4,000 PER MONTH

40 variants, always-on testing, new concepts weekly. Direct Slack access when a winner needs variations now. For serious spenders who treat creative as the growth lever.

TERMS, PLAINLY — **60-day minimum, then month-to-month.** Creative needs one full learning cycle to prove itself. After 60 days, stay because it works, not because a contract says so.

See it on your product first.

Send us your product link and we will cut 1–2 spec hooks for it — free, no meeting required. If the hooks do not make you want the full batch, you have lost nothing. The work is the pitch.
